## ABOUT US

### **Our Vision**

Elevate the smart home experience with innovative, high-quality, and elegantly designed smart switches and devices.

### **Our Mission**

Lead the smart home industry in innovation, design and customer satisfaction. We strive to make intelligent living accessible to all, creating homes that are efficient, secure, and comfortable.

# Who We Are?

SMART APEX, a Spain-Licensed brand having its main distribution HUB based in Oman for the easy accesses to MENA market, manufactures a wide range of premium quality lighting Keypads, Thermostatic Switches, HVAC Control Modules, Floor temp adjustment controls, Blind Controls and different types of Din-Rail Relay Modules and Gateways in China.

Since the establishment of Smart APEX in 2013, Innovation and style have been tied into the fabric of our production. As the developer and manufacturer of smart lighting solutions, we have always tried to reflect our commitment to the consumers by the craftsmanship of our products.

APEX, now, owns its provision channels in MENA and European countries cooperating with NICE, Control4, Crestron and home assistant related Dealers.

## Works With

Home Assistant

# PROTOCOL

Weird and Wireless solution

Apex offers a comprehensive range of smart home solutions, seamlessly integrating both wired and wireless technologies to meet diverse client needs.

# Why Choose US?

**Positive feedback** of many NICE, Control4, Crestron Dealers experiencing their projects with APEX

**A-Z Customer-Care** from Technical and Solution-Based consultancy to Planning and After Sales Services.

**Unique, premium quality products** designed to affect your offers to the clients

**Clear Warranty and support** which is a real made-easy warranty process in the least possible time

## **R&D**

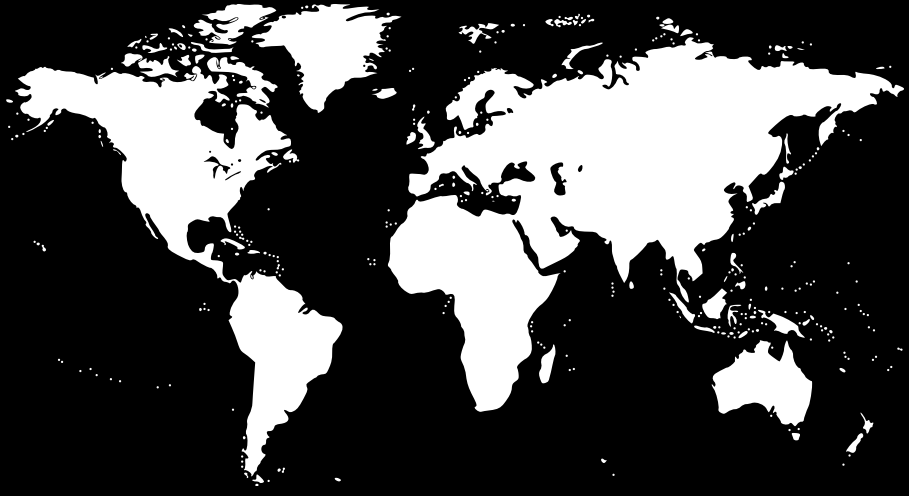

our R&D team always seeks out to further the innovation in wider technical integration, ease of use and robust network connection. To that end, not only we offer Z-wave and Z-wave Plus solution for the wireless protocols but also we have developed the requirements for Fibaro wired connection to fit demands on request.

We also provide Control4 related lighting keypads and thermostatic switches along with dimmers, Dali, and other Din-Rail Modules and Gateways.

## **Technical Courses**

As for the perceived convenience of our partners in communication with our Tech Dep., we have always been required to perform Tech courses in different related areas of smart home for their home automation forefront network.
